

## SLIDING TYPE TURNSTILE

Model: 868H-CO

### Principle

A sensor controlled passageway with glass wings to prevent unauthorized passage provides excellent access control. Designed to be in sight of reception staff, the Argus takes the problem out of checking individual passes whilst allowing authorized persons to pass unhindered. The unit is at its optimum when used in conjunction with a hands free access system which allows the glass wings to stay in the open position until an unauthorized person is detected.

### Finish

- Steel, painted according to RAL
  - Stainless steel, satin finish
- Other models on request

### Construction

Casing and guiding tube sheets of high-quality.  
Glazing: 10 mm toughened glass

### Door leaves

- Normal height, rectangular
  - Extra height, rectangular
- Customer design by agreement

### Reader interface

Compatible with access control systems standards

- Serial interfaces
- Fieldbus cross linkage

Special interfaces, signal exchange with building services automation and connection of customer supplied control elements available on request.  
Export variants on request
